

## **Certified Laboratory Findings**

The HVAC controller was tested under laboratory conditions as prescribed by ARI 210/240-2006 & ANSI/ASHRAE Standard 37-2005 as published by the American Refrigeration Institute (ARI) and the American Society of Heating, Refrigeration and Air Conditioning Engineers, Inc. This testing was conducted by the Global leader of Performance Verification Testing, Intertek-ETL Semko laboratory. This testing was done at the request of CAF Energy Inc. and was not part of a certification program.

### **RESULTS:**

After installation of the Pace II the energy savings recorded and reported by Intertek-ETL Semko was 32%. A Registered Professional Engineer issued findings in a report that the Btuh after installation of the Pace II was the equivalent to the Btuh generated during the pre install test period. In that report the EER (Energy Efficiency Rating) was increased by 47%.

Full reports are available for inspection by qualified prospective clients
